Port Engineer  
Docks & Harbors Department  
City & Borough of Juneau

November 22, 2004

To Whom It May Concern:

Dawson Construction, Inc., has been the successful low bidder on two recent Juneau harbor construction jobs. I was the project engineer for both projects and I handled all financial and contracting matters, and field inspection oversight. I have been very pleased with Dawson's personnel, corporate structure, and construction performance.

Don Lindsay, Dawson's vice president, was my primary point of contact. Mr. Lindsay's superior professionalism was apparent during our first pre-construction meeting. He continues to display that thorough professionalism in addressing unforeseen items, coordinating with subcontractors, and during contract revision negotiations. We have resolved all issues to our mutual satisfaction without resorting to unproductive posturing.

Dawson's field supervision is second-to-none. Their Superintendents have extensive construction knowledge and enthusiasm for properly completing the job. Their attitude is that problems do not exist, just challenges. They are responsive to field requests and directives, often offering up their own suggestions to reduce costs.

Dawson's employees and subcontractors display a strong work ethic. The public often comments on the work crews proficiency and politeness. I have always been pleased with the "ownership" attitude they display, an attitude that creates a successful project.

Overall, Dawson Construction has been a superior company to work with and I look forward to working with them on future projects. I strongly encourage developers to consider Dawson for their construction projects.

If you would like additional information, you can telephone me at (907) 586-0292.

Sincerely,

Mike Krieber, P.E.  
Port Engineer
